

# Payhembury Weather [www.payhembury-weather.co.uk](http://www.payhembury-weather.co.uk)

**Rainfall:** July and so far in August have been dry months with less than half the average. Water butts are getting empty. By the time you read this though we should have had some welcome rain for the garden.

**Temperatures:** Temperatures have been close to normal this summer with no exceptional heat waves and 27 degC being the highest temperature in Payhembury on 19<sup>th</sup> July.

**Weather elsewhere:** With prolonged drought in California wild fires have been forcing people out of their homes and it has been the same near Marseille in southern France and Portugal. In contrast at least 11 people have died in severe flooding that has swamped a large swath of southeastern Louisiana and southern Mississippi. Finally July 2016 has been reported by NASA to be the world's hottest month on record.
