

# Payhembury Weather [www.payhembury-weather.co.uk](http://www.payhembury-weather.co.uk)

**Rainfall:** April and the first half of May have had less than the normal rainfall although very heavy downpours experienced and local flooding in Feniton on the evening of 11<sup>th</sup> May.

**Temperatures:** Daytime temperatures were above average in both months but the April night-time temperatures were cooler than normal and some Spring frosts were experienced. We did experience a warmer spell at the beginning of May.

**Weather elsewhere:** April was the seventh month in a row that broke global temperature records and this was one of the factors leading to the Canadian Wildfires with prime tinder for fires to start. As a result 80,000 people were evacuated from the town of Fort McMurry in Alberta.
