

Payhembury Weather

www.payhembury-weather.co.uk

Rainfall: April was wetter than average with 30 mm falling on 5 April. May has been fairly dry so far with not much rain in the forecast so the seeds in the garden are beginning to need watering.

Temperatures: For April it was warmer than average but there have been some cold nights at the beginning of May which have been close to record lows. Luckily the tender plants seem to have just survived.

Weather elsewhere: Cyclone Fani hit the eastern coast of India and Bangladesh at the beginning of May killing several people but the improved warning systems now in place meant many people were evacuated from the area in advance of the Cyclone's arrival saving many lives. Quebec and Ontario have experienced severe flooding from the rivers with snow melt and heavy rain and by 29 April, 2019, around 9,500 people had evacuated their homes.
