

Payhembury Weather www.payhembury-weather.co.uk

Rainfall: October rainfall was close to the average but the start of November has been very wet with three times the normal rainfall. Local flooding was experienced around Payhembury on 8th November and once again storms battered the coast.

Temperatures: October and November temperatures continue the trend of being very warm with records broken for highest maximum in November and highest minimum in October. As a result lawn mowing has continued into November.

Weather elsewhere: Severe flooding in N.W. Italy on 15th November. The Met Office opened its Space Weather Forecasting Centre on 8th October. Space weather covers a variety of phenomenon including impacts from solar flares, geomagnetic storms and coronal mass ejections from the Sun. These can impact our satellite services, power distribution and exposure to radiation of flights over the poles. Finally a study has shown that the ozone hole is on track to recover in a few decades as a result of phasing out the ozone depleting chemicals.

Payhembury Monthly Temperatures degC
