

Payhembury Weather

www.payhembury-weather.co.uk

Rainfall: For both October and so far in November we have had almost twice the normal rainfall resulting in damp fields and faster flowing rivers with nearly 20 mm falling on 30 October. Thankfully no flooding yet.

Temperatures: The temperatures of late although being slightly warmer than average during the day have been colder at night with the temperature dropping below average at the end of October and the beginning of November.

Weather elsewhere: High rainfall amounts have been experienced in the Midlands resulting in flooding around the river Don in Sheffield and along the river Avon in Evesham and Stratford. Further afield Venice has experienced the worse flooding for 50 years with St Marks Square being used as a swimming pool. In contrast in Australia around Sydney many homes are at threat due to bushfires and its only just at the start of their summer.
