

# Payhembury Weather [www.payhembury-weather.co.uk](http://www.payhembury-weather.co.uk)

**Rainfall:** August was a dry month with only half the normal rainfall and September has started pretty dry also with only one big storm on 10 September.

**Temperatures:** Temperatures were slightly above normal for August but have been well above normal in the first part of September. Unfortunately my figures for the first few days of September are lost in the cloud at the moment so hopefully I can publish next month.

**Weather elsewhere:** The south-east has been experiencing record heat waves for September interlaced with thunderstorms causing localised flooding with trains from Paddington cancelled. So far the mean temperature in September for England is warmer than it was for June, July or August! As I write this though it has started to cool down to more normal temperatures.

**Payhembury Monthly Temperatures degC**

Aug 16	1960-90 Climate	Measured Averages	Warmer or colder than average?
